v11.1.1				Υ		
v11.0.3				Υ		

<sup>\*</sup>tags marked in green are actively supported

<sup>\*</sup>a tag is marked EOL, when the last driver it supports goes EOL (e.g. 11.4.3 marked EOL on Jul-2024)

<sup>\*</sup>a tag is marked EOL, when a new patch version is released (e.g. after 12.1.1 release, 12.1.0 is marked EOL)

<sup>\*</sup>tags marked EOL are available for atleast 6 months before sunsetted, providing users time to plan for upgrade

<sup>\*</sup>additionally "build.sh" script can be used to build containers for any tags released in the past and deprecated
